

# Survival Quest

## Safe, focused lifeboat training

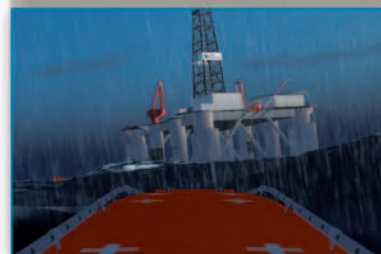

SurvivalQuest is a lifeboat simulator that eliminates training risk and ensures coxswains are prepared to launch in any situation. SurvivalQuest combines breathtaking visual realism, high-fidelity launch and maneuvering performance, and total instructional control to deliver a safe, focused training environment.

The specific training elements delivered by SurvivalQuest include: control familiarization and pre-launch check, launch timing and sail away procedures, high sea state navigation and pilotage, and equipment fault and failure response.

By incorporating SurvivalQuest into lifeboat training programs, organizations are able to:

- ▶ Increase training frequency and focus
- ▶ Mitigate training and operational risk
- ▶ Reduce training costs
